Contents Volume 80 (1993)

The effect of shell side hydrodynamics on the performance of axial flow hollow fibre modules
M.J. Costello, A.G. Fane, P.A. Hogan and R.W. Schofield (Kensington, N.S.W., Australia) 1

Scaling up pulsatile filtration flow methods to a pilot apparatus equipped with mineral membranes
B.B. Gupta, B. Zaboubi and M.Y. Jaffrin (Compiègne, France) 13

Extraction of organic components from aqueous streams by vacuum membrane distillation
G.C. Sarti, C. Gostoli and S. Bandini (Bologna, Italy) 21

Enhanced performance for pressure-driven membrane processes: the argument for fluid instabilities
H.B. Winzeler (Winterthur, Switzerland) and G. Belfort (Troy, NY, USA) 35

A new generator of unsteady-state flow regime in tubular membranes as an anti-fouling technique: A hydrodynamic approach
E. Spiazzi, J. Lenoir (Villeurbanne, France) and A. Grangeon (Miribel, France) 49

Yeast cell microfiltration: Flux enhancement in baffled and pulsatile flow systems
J.A. Howell, R.W. Field and D. Wu (Bath, UK) 59

Diffusive flows in ultrafiltration and their effect on membrane retention properties
V. Gekas, G. Trägårdh (Lund, Sweden), P. Aimar and V. Sanchez (Toulouse, France) 73

Comparison of the separation of lactic acid and L-leucine by liquid emulsion membranes
H. Reisinger and R. Marr (Graz, Austria) 85

Hollow-fibre pertractor with bulk liquid membrane
Š. Schlosser, I. Rothová and H. Frianová (Bratislava, Slovak Republic) 99

Ideal limiting fluxes in ultrafiltration: comparison of various theoretical relationships
R.W. Field (Bath, UK) and P. Aimar (Toulouse, France) 107

Use of intermittent jets to enhance flux in crossflow filtration
G. Arroyo (Rennes, France) and C. Fonade (Toulouse, France) 117

Fouling during constant flux crossflow microfiltration of pretreated whey. Influence of transmembrane pressure gradient
G. Gésan, G. Daufin (Rennes, France), U. Merin (Bet Dagan, Israel), J.-P. Labbé (Paris, France) and A. Quémerais (Rennes, France) 131

Gas separation in an internally staged permeator: experimental results and theoretical predictions
K. Li (Kent Ridge Crescent, Singapore), D.R. Acharya and R. Hughes (Salford, UK) 147

Design and development of a membrane testcell with uniform mass transfer: Application to characterisation of high flux gas separation membranes
P. Feron, J.W. Van Heuven, J.J. Akkerhuis and R. Van der Welle (Apeldoorn, The Netherlands) 157

Microfiltration of protein solutions at thin film composite membranes
W.R. Bowen and Q. Gan (Swansea, UK) 165

The influence of protein aggregates on the fouling of microfiltration membranes during stirred cell filtration
S.T. Kelly, W.S. Opong and A.L. Zydney (Newark, DE, USA) 175

Adsorbent filled membranes for gas separation. Part 1. Improvement of the gas separation properties of polymeric membranes by incorporation of microporous adsorbents
J.-M. Duval, B. Folkers, M.H.V. Mulder (Enschede, The Netherlands), G. Desgrandchamps (Artix, France) and C.A. Smolders (Enschede, The Netherlands) 189

On-line water removal during enzymatic triacylglycerol synthesis by means of pervaporation
A. Van der Padt, J.J.W. Sewalt and K. Van 't Riet (Wageningen, The Netherlands) 199

Pulsed-electric-field crossflow ultrafiltration of bovine serum albumin
C.W. Robinson, M.H. Siegel, A. Condemine, C. Fee, T.Z. Fahidy and B.R. Glick (Waterloo, Ont., Canada) 209

Enhanced separation of albumin–poly(ethylene glycol) by combination of ultrafiltration and electrophoresis
S. Lentsch, P. Aimar (Toulouse, France) and J.L. Orozco (Artix, France) 221

Membrane bioprocesses for the denitrification of drinking water supplies
J. Chang, J. Manem and A. Beaubien (Le Pecq, France) 233

The cleaning of ultrafiltration membranes fouled by protein
K.-J. Kim, P. Sun, V. Chen, D.E. Wiley and A.G. Fane (Kensington, N.S.W., Australia) 241

Improved spacer design and cost reduction in an electrodialysis system
J.-M. Chiapello and M. Bernard (Bagneaux-sur-Loing, France) 251

Fractionation of casein hydrolysates using polysulfone ultrafiltration hollow fiber membranes
Y. Pouliot, S.F. Gauthier and C. Bard (Québec, Canada) 257

Membrane modification to avoid wettability changes due to protein adsorption in an emulsion/membrane bioreactor
C.G.P.H. Schroën, M.C. Wijers, M.A. Cohen-Stuart, A. Van der Padt and K. Van 't Riet (Wageningen, The Netherlands) 265

Transport of Na_2SO_4 and $MgSO_4$ solutions through a composite membrane
J. Benavente (Málaga, Spain) and G. Jonsson (Lyngby, Denmark) 275

Proper and adsorbed charges on the surfaces of the polysulfonic support of a composite membrane from electrokinetic phenomena
J. Benavente (Málaga, Spain), A. Hernández (Valladolid, Spain) and G. Jonsson (Lyngby, Denmark) 285

Preferential sorption of modified PVA membrane in pervaporation
Y. Zhang (Tianjin, China), K. Zhang and J. Xu (Changchun, China) 297

Recovery of pyridine from aqueous solution by membrane pervaporation
E. Drioli, S. Zhang and A. Basile (Arcavacata di Rende CS, Italy) 309

Extraction of strontium ions with emulsion liquid membrane technique
İ. Eroğlu, R. Kalpakçi and G. Gündüz (Ankara, Turkey) 319
